# WHAT IS SOCIAL PRESENCING THEATER ??

Social Presencing Theater (SPT) is a unique methodology that uses movement and awareness to gain deeper insights into social systems and unlock new possibilities for change.

Through simple body postures and movements, SPT allows us to dissolve limiting concepts, communicate directly, and access our intuition to gain deeper insights into complex social systems.

This makes it a powerful tool for promoting sustainability and inspiring leadership, as it can help us develop effective strategies for positive change and inspire others to take action.
